

In this lecture, you will learn -

1. About the calculated fields and filters in Tableau.
2. To create a Dashboard and its filter.
3. To create a story using the dashboard and available sheets.

Outcome-

By the end of this lecture, you will be able to present your insights to the stakeholders through the charts.

To make the best use of this lecture, we advise you to keep the following points in mind -

Take Notes: While watching a video, it is always good to have a pen and paper to note all the important concepts covered in the video. It will help you remember those concepts better.

Additional Resources: We have covered all the important concepts through videos and notes, but exploring some additional resources available online is always better. We have compiled some notes after the video lecture for your reference.

Try it yourself: After watching the video try to practice the same. You can write your additional programs to understand concepts for better understanding.
